

# DATA FOR PROGRESS

From January 6 to 8, 2023, Data for Progress conducted a survey of 1,387 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,387 unless otherwise specified.

**[1]** Do you support or oppose allowing retail pharmacies like CVS and Walgreens to sell abortion pills to patients with a prescription from their doctor?

**[2]** The Food and Drug Administration just issued a new rule regarding mifepristone, a medication used for abortions. The rule will allow retail pharmacies like CVS and Walgreens to sell abortion pills to pregnant people with a prescription. This rule would not apply in states that have a near-total abortion ban.

Before this rule, pregnant people could **only** receive the pill directly from their doctor or by mail with a prescription, depending on their state's laws.

Knowing what you know now, do you support or oppose allowing retail pharmacies like CVS and Walgreens to sell abortion pills to patients with a prescription from their doctor?

**[4]** The Department of Justice also issued a new ruling on abortion pills. The ruling confirms that the U.S. Postal Service can continue delivering prescription abortion pills, regardless of their destination and the laws in that state.

Do you support or oppose allowing the U.S.P.S. to deliver prescription abortion pills by mail, even in states where abortion is restricted?
