## ш DATA FOR **PROGRESS**

From November 22 to 25, 2023, Data for Progress conducted a survey of 1,201 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,201 unless otherwise specified.

[1] When you hear the term "electric vehicle" or "EV," which of the following options most aligns with your understanding?

Response	Topline	Democrat	Inde- pendent / Third party	Repub lican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
Vehicles that do not have an internal combustion engine and instead operate entirely on electricity	62	60	65	62	53	72	57	64	61	64	58	63	57
Vehicles that have an internal combustion engine and are powered by gasoline, but use electricity to enhance efficiency	8	12	5	7	9	7	13	5	7	9	13	7	9
Both of these types of vehicles would be classified as EVs	23	23	21	23	28	17	21	23	23	22	23	23	23
Don't know	7	5	9	8	10	5	8	7	9	5	6	7	10
Weighted N	1,201	426	362	413	643	558	428	773	770	431	132	872	150
