📊 DATA FOR *PROGRESS*

From October 31 to November 2, 2023, Data for Progress conducted a survey of 597 likely 2024 general election voters in Ohio using SMS and web panel respondents. The sample was weighted to be representative of likely general election voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±4 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. Some values may not add up to 100 due to rounding.

N=597 unless otherwise specified.

From October 31 to November 2, 2023, Data for Progress conducted a survey of 597 likely 2024 general election voters in Ohio using SMS and web panel respondents. Within this sample, a subgroup of 294 respondents self-identified as likely 2024 Republican primary voters. The subgroup was weighted to be representative of likely Republican primary voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±6 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. Some values may not add up to 100 due to rounding.

N=294 unless otherwise specified.
