

From February 14 to 20, 2023, Data for Progress, in collaboration with Stand Up America, conducted a survey of 1,105 likely voters in New York using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,105 unless otherwise specified.

[1] How concerned or unconcerned would you say you are about the influence of wealthy donors in New York politics?

Response	Topline	Democrat	Inde- pendent / Third party	Repub lican	Female	Male	Under 45	45+	No college	College	Black or African American	White	Latino/a	Capital Region	Central	Finger Lakes	Long Island	Mid- Hudson	New York City	North Country	Western

[5] In November 2022, New York launched its voluntary small-donor matching program. Beginning in 2024, this program aims to increase the power of everyday donors and reduce the influence of big donors by using public funds to match small donations from state residents to participating state candidates who volunteer to join.

This program is estimated to cost far less than half a percent (about 0.045%) of the state's budget.

An example of how the small-donor matching program will work:

- If you donate \$1 to a statewide candidate, the program matches it by \$6, so a \$20 donation is worth \$140 to the candidate
- If you donate \$1 to a legislative candidate, the program matches it by \$12, so a \$20 donation is worth \$260 to the candidate

Do you support or oppose the small-donor matching program?

Response	Topline	Democrat	Inde- pendent / Third party	Repub lican	Female	Male	Under 45	45+	No college	College	Black or African American	White	Latino/a	Capital Region	Central	Finger Lakes		Mid- Hudson	New York City	North Country	Western

[6] In November 2022, New York launched its voluntary small-donor matching program estimated to cost far less than half a percent (about 0.045%) of the state's budget.

Supporters of the program say it gives everyday voters a louder voice with candidates, who can spend more time seeking local support and less time trying to raise money from wealthy donors.

Opponents of the program say that taxpayer money should not be used to pay the bill for a candidate's campaign and instead, it should be used for other important issues that affect taxpayers.

Thinking again about this, do you support or oppose the small-donor matching program?

[8] Currently, New York's small-donor matching program is estimated to cost far less than half a percent (about 0.045%) of the state's budget.

State leadership is currently negotiating New York's next budget.

Do you support or oppose state leaders providing sufficient funding for the small-donor matching program so it can run as intended?
