

From January 28 to February 1, 2023, Data for Progress conducted a survey of 858 likely voters in Minnesota using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is  $\pm 3$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=858 unless otherwise specified.

**[1]** Would you like to see Minnesota produce more, less, or the same amount of energy from **clean, carbon-free energy sources**, such as wind and solar power?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College
I would like to see Minnesota produce more energy from carbon-free energy sources.	55	88	55	23	58	53	63	52	52	61
I would like to see Minnesota produce the same amount of energy from carbon-free energy sources.	23	7	23	40	22	24	19	25	23	22
I would like to see Minnesota produce less energy from carbon-free energy sources.	16	3	17	29	13	20	13	17	18	13

**[2]** The Minnesota state legislature is currently considering a bill that would require the state to generate 100 percent of its energy from carbon-free energy sources by 2040. Carbon-free energy can be generated in a variety of ways, including from wind, hydroelectric, solar, and nuclear power sources.

Do you support or oppose Minnesota moving to generate 100 percent of its energy from carbon-free energy sources by 2040?

**[3]** Last year, Congress passed the Inflation Reduction Act of 2022. This bill invests approximately \$370 billion in energy security and actions to address climate change. The clean energy provisions of this bill will ramp up the production of American-made clean energy production technologies, like solar and wind power, and electric vehicles.

Do you support or oppose the Inflation Reduction Act of 2022?
