

DATA FOR **PROGRESS**

From February 3 to 6, 2023, Data for Progress conducted a survey of 1,148 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,148 unless otherwise specified.

[1] The Inflation Reduction Act of 2022 invests over \$430 billion in clean energy and Affordable Care Act healthcare premiums. It also allows Medicare to negotiate lower drug prices and pays down the national debt by \$300 billion.

[2] A bipartisan majority of lawmakers in Congress passed the Infrastructure Investment and Jobs Act. This law provided increased funding for highways, transit, railways, and many other transportation infrastructure programs. This law also included funding for broadband internet expansion, water sanitation, and electrical grid renewal. This law received support from many Democratic and Republican members of Congress.

[3] A bipartisan majority of lawmakers in Congress passed the CHIPS and Science Act. This law creates new federal research programs to strengthen supply chains and clean energy research and development by investing in domestic manufacturing of semiconductors, which are critical components of manufacturing processes. The bill will also provide funding to boost U.S. scientific research and development.

Do you support or oppose the CHIPS and Science Act?
