𝖽𝖺 DATA FOR *PROGRESS*

From May 15 to 22, 2023, Data for Progress conducted a survey of 586 likely voters in New York City using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, andvoting history. The survey was conducted in English. The margin of error is ±4 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=586 unless otherwise specified.
