

DATA FOR PROGRESS

From March 22 to 24, 2023, Data for Progress conducted a survey of 1,194 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,194 unless otherwise specified.

[1] How much have you seen, read, or heard about OpenAI's ChatGPT service?

[11] As artificial intelligence (AI) advances, it could lead to the innovation of entire industries, advance scientific knowledge, and reduce costs across society. However, AI could also contribute to misinformation, displace workers from jobs across sectors, and facilitate discrimination and surveillance.

Which of these statements best describes your view, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	No College	College	Black or African American	White	Latino/a	18 to 34	35 to 44	45 to 54	55 to 64	65+
The US should not slow down AI progress, given the potential economic and societal benefits. We do not want to be left behind —especially as China advances its own AI technology.	35	41	34	32	28	44	30	44	44	34	37	40	38	35	28	36
The US should slow down AI progress, even if sacrificing short-term growth. We do not understand current AI models and should be cautious, given their risks and potential large-scale impacts.	56	52	57	58	60	51	61	48	50	57	53	52	52	54	59	59

[12] In response to concerns about artificial intelligence (AI), some lawmakers have proposed the creation of a dedicated federal agency to regulate the technology.

The proposed agency would be staffed with experts on AI and have the authority to set rules and standards for the development, deployment, and use of AI systems.

Would you **support** or **oppose** creating a dedicated federal agency to regulate AI?

[13] A few major corporations like Google, Microsoft, and Meta control most recent artificial intelligence (AI) breakthroughs, including ChatGPT. As other businesses — and even governments — begin to rely on their technology, this will likely increase their market control and influence.

Some have proposed undertaking antitrust actions against these companies to limit their control over AI technology. Such actions could include breaking up big companies, limiting mergers, or encouraging open source technology.

Which of the following comes closest to your view, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	No College	College	Black or African American	White	Latino/a	18 to 34	35 to 44	45 to 54	55 to 64	65+
Companies like Google, Microsoft, and Meta already have too much power over our economy, society, and government. As AI advances, antitrust action against Big Tech is necessary to protect the free market and access to this technology.	66	64	66	67	66	65	67	63	51	67	60	60	58	68	68	69
Companies like Google, Microsoft, and Meta are developing valuable AI technologies that benefit society. Antitrust action will limit their progress developing these technologies and hurt our economy.	23	25	22	21	20	26	20	28	31	21	29	28	29	20	17	22
Don't know	12	11	12	12	14	9	13	9	18	12	10	12	12	12	16	8

[14] To develop artificial intelligence (AI) tools, these technologies must be "trained" with large amounts of information. The information used to train AI can influence its behavior. For example, training AI on academic articles may result in AI tools using a formal and scholarly tone. In contrast, training AI on social media posts may result in AI tools sharing inaccurate information.

Currently, AI companies are not required to disclose what training data they use. By making the training text publicly available, consumers can better understand the potential biases and limitations of an AI service.

Would you **support** or **oppose** a law that requires companies to be transparent about the data they use to train their AI?
