

From July 21 to 23, 2023, Data for Progress and Climate Power conducted a survey of 1,284 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,284 unless otherwise specified.

**[1]** Thinking about your experience with extreme weather events like heat waves, floods, wildfire smoke, and droughts, have these extreme weather events impacted any of the following? Please select **all** that apply.

— My home or housing
