

From July 21 to 23, 2023, Data for Progress and Climate Power conducted a survey of 1,284 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,284 unless otherwise specified.

[1] Thinking about our country's economic priorities, do you agree or disagree with the following statements?

— Investing in new clean energy will support thousands of Americans and their families with good-paying jobs

[11] Now you'll read some more about President Biden's economic agenda, recently dubbed "Bidenomics." So far, Bidenomics has achieved:

- Over 13 million jobs created since the President took office, the highest of any president in recent decades
- A historic low unemployment rate of 3.7%, and an unemployment rate below 4 percent for the longest period since the 1960s
- More than 35,000 projects already funded, spurring job growth in communities across the country
- More than \$243 billion invested in nearly 200 clean energy projects across 41 states

Knowing what you know now, do you support or oppose President Biden's economic agenda?
