

# DATA FOR PROGRESS

From August 25 to 28, 2023, Data for Progress conducted a survey of 1,221 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is  $\pm 3$  percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,221 unless otherwise specified.

**[1]** Listed below are policies that some lawmakers in Congress are considering. For each policy, please say whether you support or oppose it.

— Giving Medicare more power to negotiate lower prices for all prescription drugs
