

DATA FOR **PROGRESS**

From January 19 to 21, 2024, Data for Progress conducted a survey of 1,219 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,219 unless otherwise specified.

[1] Some lawmakers in Congress have proposed expanding the Child Tax Credit. This would allow most families to receive up to \$2,000 for each child they have, annually.

Do you support or oppose expanding the Child Tax Credit?

[2] Some lawmakers in Congress have proposed expanding the Child Tax Credit. This would allow all families to receive up to \$2,000 for each child they have, annually.

The expanded Child Tax Credit would apply to all families, including those that do not earn income.

Knowing what you know now, do you support or oppose expanding the Child Tax Credit?

[4] When it comes to taxes on large corporations, which statement comes closest to your view, even if neither is exactly correct?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
We should not decrease taxes on large corporations. Large businesses that have made record profits and increased their prices do not need lower taxes when we could use the funds to support working families across America.	68	76	72	55	70	65	65	69	67	69	65	68	65
We should decrease taxes on large corporations. Lower taxes on large businesses can support research and development, allowing these businesses to develop new technologies, create jobs, and enhance our global competitiveness.	24	17	15	36	21	27	24	23	23	24	25	24	21
