📊 DATA FOR *PROGRESS*

From March 15 to 17, 2024, Data for Progress conducted a survey of 1,196 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,196 unless otherwise specified.

[1] Lawmakers recently introduced legislation to reduce the standard workweek from five days (40 hours) to four days (32 hours) without loss of pay or benefits.

Which of these statements best describes your view, even if neither is exactly right?

Response	Topline	Democrat	Inde-pendent / Third party	Repub lican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
We should move to a 32-hour workweek, because it will reduce stress levels and allow Americans to enjoy a better quality of life. American workers are more productive than ever, yet many are working longer hours for lower wages.	57	69	58	44	62	52	68	51	56	60	62	55	60
We should not move to a 32-hour work week, because it will reduce worker productivity and business revenue. This would put extra burdens on companies, potentially forcing them to hire additional workers or pay workers overtime.	34	24	31	49	29	41	24	40	35	34	28	36	30
