M DATA FOR **PROGRESS**

From March 6 to 8, 2024, Data for Progress conducted a survey of 1,227 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,227 unless otherwise specified.

[1] Artificial intelligence (AI) models are often trained on large amounts of data to automate various human functions, such as decision-making.

For example, a company can use AI models to assess whether people qualify for housing, employment, or financial loans.

How concerned are you, if at all, about artificial intelligence (AI) analyzing incomplete data and making predictions that discriminate against people and groups?

Response	Topline	Democrat	Independent / Third party	Repub- lican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
Very concerned	40	38	39	42	44	35	32	44	39	41	38	40	38
Somewhat concerned	37	39	38	34	36	37	34	38	35	41	34	38	31
Only a little concerned	16	17	15	15	13	19	21	13	17	13	18	15	19
Not at all concerned	8	7	8	9	7	9	13	5	9	5	11	7	11
