

DATA FOR PROGRESS

From March 8 to 14, 2024, Data for Progress conducted a survey of 873 LGBTQ+ adults nationally using web panel respondents. Respondents were defined as LGBTQ+ if they identified as LGBTQ+, transgender, a sexual orientation other than straight or heterosexual, or a gender identity other than male or female. The sample was weighted to be representative of the adult LGBTQ+ community by age, gender, education, and race using the U.S. Census Bureau's Household Pulse Survey (HPS) data on the national LGBTQ+ adult population. This sample is also weighted to account for an oversample of transgender adults to ensure proportional representation of the LGBTQ+ adult population.

The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=873 unless otherwise specified.

[1] Do you think that life quality for LGBTQ+ Americans has gotten better, worse, or stayed about the same in the past year?

Response	Topline	Female	Male	Black or African American	White	Latino	Does not identify as transgender	Identifies as transgender	18-24	25-39	40-54	55-64	65+

[21] Recently, there have been discussions about the impact of social media on young people.

Which of the following statements comes closer to your view, even if neither is exactly right?

Response	Topline	Female	Male	Black or African American	White	Latino	Does not identify as transgender	Identifies as transgender	18-24	25-39	40-54	55-64	65+
Access to social media is helpful. LGBTQ+ young people need to have access to safe, inclusive spaces online because many of them lack safe spaces to visit in person.	62	58	66	56	62	64	60	75	65	61	64	50	68
Access to social media is harmful. It is a source of cyberbullying and anti-LGBTQ+ harassment that negatively impacts young people's mental health.	23	24	22	16	24	22	24	16	20	25	20	35	16
Don't know	15	18	12	28	14	14	16	9	15	15	15	15	16
Weighted N	873	454	419	79	532	256	786	87	209	358	157	79	70

[22] The Human Rights Campaign, the nation's largest LGBTQ+ civil rights organization, declared a state of emergency for LGBTQ+ people in the United States for the first time in September 2023, citing "an unprecedented and dangerous spike in anti-LGBTQ+ legislative assaults sweeping state houses this year."

Do you agree or disagree that LGBTQ+ Americans are facing a national state of emergency?

Response	Topline	Female	Male	Black or African American	White	Latino	Does not identify as transgender	Identifies as transgender	18-24	25-39	40-54	55-64	65+
