┏ DATA FOR *PROGRESS*

From March 27 to 29, 2024, Data for Progress conducted a survey of 1,200 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,200 unless otherwise specified.

[1] For each of the following programs, say whether you think the U.S. government should cut funding, increase funding, or keep funding the same.

— Medicaid

[7] The Inflation Reduction Act of 2022 included a provision that ensures that seniors on Medicare pay no more than $35 per month for insulin.

Some legislators have proposed repealing this $35 per month cap on insulin costs.

Which of the following comes closest to your view, even if neither is exactly right?

Response	Topline	Democrat	Inde-pendent / Third party	Repub lican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
We should keep the $35 per month cap on insulin costs for seniors on Medicare	79	81	82	75	79	79	69	84	77	81	70	83	71

[8] Recently, President Biden signed into law legislation to add an annual $2,000 cap to out-of-pocket spending through Medicare Part D, the part of Medicare that covers the cost of prescription drugs. This would mean that no one on Medicare would pay more than $2,000 a year for prescription drugs.

Do you support or oppose this legislation?
