

DATA FOR PROGRESS

From April 19 to 22, 2024, Data for Progress conducted a survey of 1,265 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

Swing state voter is defined as voter living in: Arizona, Georgia, Michigan, North Carolina, Nevada, Pennsylvania, or Wisconsin.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,265 unless otherwise specified.

[1] Do you support or oppose each of the following policies?

— Require stronger safety protections for workers, including for workers dealing with extreme heat

[9] The Inflation Reduction Act of 2022 included an annual \$2,000 cap on out-of-pocket spending through Medicare Part D, the part of Medicare that covers the cost of prescription drugs. This means that **no one on Medicare** will pay more than \$2,000 a year for prescription drugs starting in 2025.

Do you support or oppose **expanding** this to **all Americans**, so that no one will pay more than \$2,000 a year for prescription drugs?
