

# DATA FOR PROGRESS

From May 1 to 2, 2024, Data for Progress conducted a survey of 1,240 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is  $\pm 3$  percentage points.

Swing state voter is defined as voter living in: Arizona, Georgia, Michigan, North Carolina, Nevada, Pennsylvania, or Wisconsin.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,240 unless otherwise specified.

**[1]** Some lawmakers in Congress are considering passing the Creating a Respectful and Open World for Natural Hair Act (CROWN Act).

The CROWN Act would ban discrimination based on hair textures and hairstyles that are commonly associated with a particular race or national origin. The CROWN Act has been signed into law in 23 states.

Do you support or oppose the CROWN Act?
