

DATA FOR PROGRESS

From September 13 to 16, 2024, Data for Progress conducted a survey of 1,223 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and 2020 recalled vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,223 unless otherwise specified.

[1] How familiar or unfamiliar are you with the topic of mental health, such as experiences of depression and anxiety?

[7] Some lawmakers in Congress are proposing a policy that would expand mental health access in K-12 public schools. The policy would provide more funding for K-12 public schools to partner with local mental health providers and deliver services to students at school. It would also require school staff to be trained in recognizing, assisting, and referring students who need mental health support.

Would you support or oppose this policy?

[15] Some lawmakers in Congress are proposing a policy that would divert federal funding away from supporting police presence in K-12 schools, and toward establishing a grant for schools to hire trained counselors, social workers, and school psychologists. The policy would also ensure evidence-based approaches to help improve school climate, such as positive behavioral interventions and supports, trauma therapy, and exposure to mentorships and careers are implemented.

Would you support or oppose this policy?
