

DATA FOR **PROGRESS**

From November 14 to 17, 2025, Data for Progress conducted a survey of 1,224 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,224 unless otherwise specified.

[3] Which statement comes closer to your view, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
The United States should take ambitious action to address climate change, even if other countries do not. We should lead the world on this issue and set the example for other countries to follow suit.	65	85	63	47	66	65	67	64	63	70	75	63	69
If other countries do not take action to address climate change, the United States should not either. It is not fair for us to act while other countries contributing to the problem are sitting still.	25	9	26	41	21	30	24	25	24	26	15	28	21

[6] Some countries are proposing a worldwide planned phase out of fossil fuels, including coal and oil, to address climate change.

Supporters say that phasing out fossil fuels will help lower energy costs by replacing volatile fossil fuel prices with cheaper renewable energy, while delivering cleaner air quality and a healthier environment for future generations.

Opponents say that phasing out fossil fuels will create chaos in the energy market by eliminating fossil fuel companies and jobs, while forcing consumers to buy electric vehicles and make electrification upgrades for homes and businesses.

Having read more, do you support or oppose countries agreeing to a phase out of fossil fuels at the United Nations Climate Change Conference?
