

DATA FOR **PROGRESS**

From February 14 to 15, 2025, Data for Progress conducted a survey of 1,215 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is  $\pm 3$  percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit [dataforprogress.org/our-methodology](https://dataforprogress.org/our-methodology).

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,215 unless otherwise specified.

**[1]** Lawmakers in Congress are considering how to allocate federal funds. When thinking about this, which of the following statements comes closer to your view, even if neither is exactly right?

Response	Topline	Democrat	Inde- pendent / Third party	Repub- lican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
We should prioritize funding for programs that primarily assist low-income households, even if businesses and wealthier households have to pay more in taxes.	72	87	71	58	73	70	60	78	71	73	74	72	71
We should prioritize funding for tax incentives for wealthier households and businesses, even if it means reducing funding for programs that primarily assist low-income households.	13	8	9	21	11	15	24	8	13	14	14	13	19
