

From March 7 to 10, 2025, Data for Progress conducted a survey of 1,188 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is  $\pm 3$  percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit [dataforprogress.org/our-methodology](https://dataforprogress.org/our-methodology).

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,188 unless otherwise specified.

**[1]** In recent years, prices for each of the following types of expenses have increased for a variety of reasons. Please pick the type of price increase *you personally* find **most frustrating** and **least frustrating**. If there are some categories of expenses you don't pay for, please ignore them and only rank the ones you do pay for.

*Net difference in most and least frustrating*

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
Grocery costs	22.1	20.6	22.5	23.4	23.0	21.1	13.2	26.2	23.0	20.4	12.1	24.5	18.8
