📊 DATA FOR **PROGRESS**

From January 31 to April 20, 2025, Data for Progress conducted four surveys with 4,832 respondent interviews of U.S. likely voters nationally using web panel respondents. Each sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The surveys were conducted in English. The margin of error associated with each sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

The most recent survey, with a sample size of N=1,204, was conducted from April 18 to 20, 2025.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,232 unless otherwise specified.

[1] When filling out your ballot, which of the following issues do you consider **most** when deciding which candidate to vote for? *(N=1,204)*
