

## DATA FOR **PROGRESS**

From May 22 to 24, 2025, Data for Progress conducted a survey of 1,171 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is  $\pm 3$  percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit [dataforprogress.org/our-methodology](https://dataforprogress.org/our-methodology).

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,171 unless otherwise specified.

**[1]** Do you think Americans should be able to get vaccinations for infectious diseases (such as the flu, measles, or COVID-19) regardless of whether their immune system is compromised or not?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
People should be able to get vaccinated regardless of whether their immune system is compromised or not	71	78	76	61	72	70	64	75	68	76	58	74	67
People should only be able to get vaccinated if their immune system is compromised	18	12	15	27	16	21	25	15	21	15	24	17	26
