

DATA FOR **PROGRESS**

From June 20 to 21, 2025, Data for Progress conducted a survey of 1,166 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,166 unless otherwise specified.

[10] The Federal Emergency Management Agency (FEMA) is responsible for providing communities with both disaster preparedness resources and disaster relief after extreme weather events.

The National Oceanic and Atmospheric Administration (NOAA) is responsible for producing research about the weather and climate that is relied on by services like AccuWeather or the Weather Channel, including radar maps and weather forecasts.

Do you think the federal government should increase, decrease, or keep funding the same for the following groups?

— The National Oceanic and Atmospheric Administration (NOAA)
