

From July 3 to 4, 2025, Data for Progress conducted a survey of 1,152 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,152 unless otherwise specified.

[1] What impact, if any, have the Trump administration's increased tariffs on foreign goods had on your household's monthly finances?

[2] The Trump administration issued a 90-day pause on their recent tariffs, lowering rates as high as 50% to a 10% baseline for most countries.

Unless Trump extends his pause, it will expire on July 9. If the pause expires, tariffs will return to their original higher levels.

If the pause expires, what impact will the higher tariffs have on **your household's** monthly finances?

[3] The Trump administration has said they may **extend** the 90-day pause on tariffs, keeping tariff rates lower. Do you support or oppose extending the pause?
