

DATA FOR **PROGRESS**

From August 8 to 10, 2025, Data for Progress conducted a survey of 1,176 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display $N < 50$ subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,176 unless otherwise specified.

[1] Below are two pictures of the White House Rose Garden.

The first photo was taken in August 2020 and depicts the Rose Garden with a grass lawn.

The second photo was taken in August 2025 and depicts recent changes made to replace the lawn with a concrete floor.

Do you approve or disapprove of these recent changes to the White House Rose Garden?
