

DATA FOR PROGRESS

From December 13 to 15, 2025, Data for Progress conducted a survey of 1,145 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,145 unless otherwise specified.

[20] Right now, it often takes years for the government to approve permits and conduct necessary environmental reviews for **new clean energy projects**, like solar farms or battery storage projects.

Which of the following strategies to speed up the development of new clean energy projects do you think our government should prioritize, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
Our government should prioritize cutting red tape and making permitting and environmental review processes more efficient.	44	38	47	49	48	40	32	51	46	41	28	48	35
Our government should prioritize increasing capacity by hiring new staff and making improvements to permitting and environmental review processes.	46	57	42	38	40	53	62	38	41	54	60	42	61

[21] The federal government is considering different policies that **may make it faster** to undergo the review and approval processes for different types of energy projects.

Which of these statements best describes your view, even if none are exactly right?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
The government should speed up these processes for all types of energy projects.	38	30	35	48	33	45	34	40	37	40	29	40	37
The government should speed up these processes only for renewable energy projects like wind and solar, but not for fossil fuel energy projects, like oil and gas.	43	56	43	29	43	42	47	41	41	45	48	42	49
