

From January 22 to 26, 2026, Data for Progress conducted a survey of 1,261 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is  $\pm 3$  percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit [dataforprogress.org/our-methodology](https://dataforprogress.org/our-methodology).

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,261 unless otherwise specified.

**[1]** Generally speaking, how focused do you think President Trump and Republicans in Congress are on **lowering the cost of housing** for people like you and your family?

**[4]** Which of the following statements do you agree with more, even if you think neither are exactly right?

**Statement A:** The best way to lower the cost of housing is to follow simple economics: increase supply to meet demand. We need to cut unnecessary red tape and bureaucracy, or we'll never have enough housing to go around for everyone.

**Statement B:** The best way to lower the cost of housing is to crack down on the corporate landlords and developers who jack up prices. We need to build more housing, but it won't be affordable until corporate greed is brought under control.
