DATA FOR ***PROGRESS***

From September 15 to 21, 2026, Data for Progress and the Insurance Fairness Project conducted a survey of 1,444 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The sample was also weighted to account for an additional 100 raw completes collected from voters in CA & LA each, to ensure proportional representation of likely voters. The survey was conducted in English. The margin of error associated with the sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

N=1,444 unless otherwise specified. Some values may not add up to 100 due to rounding.

[43] Some lawmakers in your state are proposing legislation that would enable individuals and insurance companies harmed by climate disasters and extreme weather events to recover their losses from oil and gas companies. They point to evidence that oil and gas companies have lied to the public about the harm their products cause as a reason why these companies should pay.

Knowing what you know now, do you support or oppose this proposal becoming law in your state?
