

# DATA FOR **PROGRESS**

From January 30 to February 2, 2026, Data for Progress conducted a survey of 1,307 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is  $\pm 3$  percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit [dataforprogress.org/our-methodology](https://dataforprogress.org/our-methodology).

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,307 unless otherwise specified.

**[3]** Recently, the Trump administration offered the following deal to the state of Minnesota:

If Minnesota hands over its voter files — which include personal information about voters in the state, such as their names, driver's license numbers, and Social Security numbers — the Trump administration will reduce the presence of ICE in the state.

Do you approve or disapprove of the Trump administration offering this deal to Minnesota?
