### Methodology

From May 1 to 6, 2026, Data for Progress conducted a survey of 517 likely primary voters in California's 22nd congressional district using SMS and web panel respondents. The sample was weighted to be representative of likely primary voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English and Spanish. The margin of error associated with the sample size is  $\pm 4$  percentage points. Results for subgroups of the sample are subject to increased margins of error.
