

From May 12 to 17, 2026, Data for Progress conducted a survey of 1,169 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,169 unless otherwise specified.

[1] Members of Congress have introduced legislation that would give oil and gas corporations immunity from any laws or lawsuits that aim to hold them accountable for their role in the climate crisis or make them pay for climate damages caused by their products.

Do you support or oppose shielding oil and gas companies from being held accountable for climate damages?
