

DATA FOR PROGRESS

From May 15 to 18, 2026, Data for Progress conducted a survey of 1,149 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,149 unless otherwise specified.

[1] Some lawmakers in Congress have introduced legislation, called a war powers resolution, that directs President Trump to stop all U.S. military operations against Iran.

The resolution states that military operations against Iran would only resume if Congress declares war or authorizes the president to use military force.

Do you support or oppose Congress passing this war powers resolution?
