

From June 26 to 29, 2026, Data for Progress conducted a survey of 1,144 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit [dataforprogress.org/our-methodology](http://dataforprogress.org/our-methodology).

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,144 unless otherwise specified.

**[14]** Below are two impacts of the "One Big Beautiful Bill Act:"

*The following bullets were rotated:*

- On average, Americans' tax refunds were \$300 higher compared to 2025.
- Over 5 million Americans have lost health insurance coverage as a result of cuts to Medicaid, the Children's Health Instance Program (CHIP), and the Affordable Care Act.

Which of the following comes closer to your opinion of the "One Big Beautiful Bill Act," even if neither is exactly right?
