

DATA FOR PROGRESS

From July 2 to 5, 2026, Data for Progress conducted a survey of 1,164 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ±3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,164 unless otherwise specified.

[1] Would you say the number of extreme weather events, like hurricanes, flash floods, droughts, or heat waves, has increased, decreased, or stayed the same over the past five years?

Response	Topline	Democrat	Inde- pendent / Third party	Repub lican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
The number of extreme weather events has increased	61	72	63	46	62	59	50	66	59	63	58	63	52
The number of extreme weather events has stayed the same	29	19	26	42	26	32	33	27	28	31	25	29	34
The number of extreme weather events has decreased	5	4	3	7	5	5	9	3	6	3	8	4	10
