

DATA FOR **PROGRESS**

Democratic Pre-Debate Survey September 10-12, 2019

Overview

This report contains the results of a Civiqs survey of 1784 likely Democratic primary and caucus voters in the United States from September 10-12, 2019. The survey was conducted online, among selected members of the Civiqs research panel. Sampled individuals were emailed by Civiqs and responded using a personalized link to the survey at civiqs.com.

Respondents were asked an initial screening question: "Are you planning to vote in your state's 2020 Democratic primary election or caucus for President?" and are screened out if they did not respond "Yes, I am planning to vote". Respondents are also excluded if on questions 2, 3, or 4, they selected "I will not vote in the Democratic primary".

The survey results are weighted by age, race, gender, education, and party identification to be representative of the population of likely Democratic primary and caucus voters in the United States. Demographic data, including self-reported party identification, was collected in previous Civiqs surveys. The general design effect due to weighting is 1.2. The survey has a margin of error of $\pm 2.5\%$ at the 95% confidence level, accounting for the design effect. All survey results in this report are rounded to the nearest percentage.
