

# Arizona Voters Support a Federal Clean Electricity Standard

---

In mid-June 2021, Data for Progress and Western Resource Advocates polled likely voters in urban, suburban, and rural Arizona to assess support for President Joe Biden’s proposed clean electricity standard, along with other key climate and clean energy provisions in the American Jobs Plan.

We found **a clear majority of Arizona voters support putting America on a path to achieving 100% clean electricity by 2035**, including a majority of Democrats and Independents and more than 40% of Republicans.

We also found Arizona voters support federal investments in clean energy jobs, even after being presented with counterarguments, and support the American Jobs Plan’s incentives for low-pollution technologies.

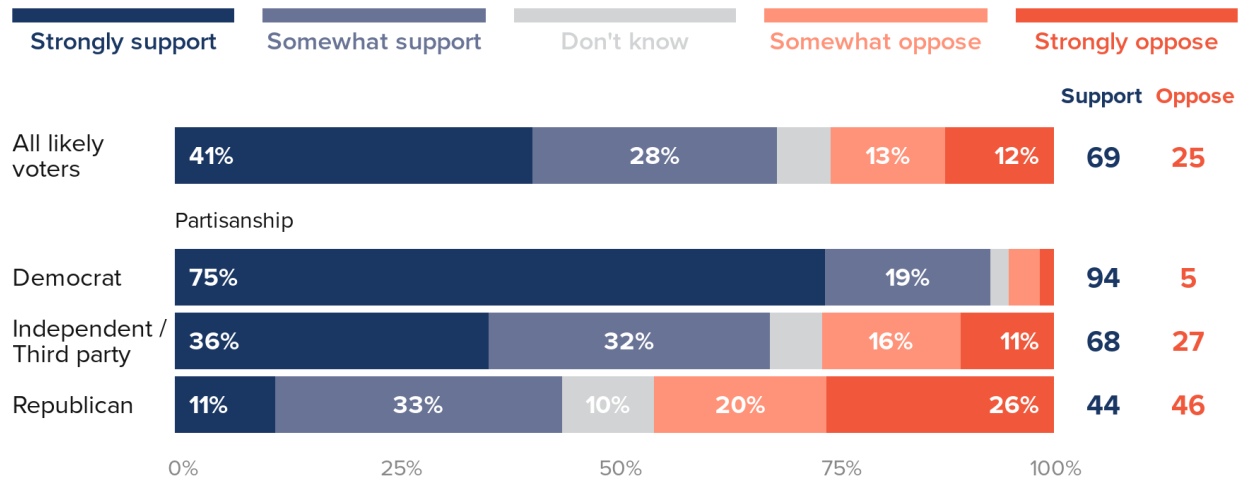

# ARIZONA VOTERS SUPPORT A FEDERAL CLEAN ELECTRICITY STANDARD

We first asked respondents about the American Jobs Plan’s proposed clean electricity standard, which would put the United States on a path toward achieving a 100% carbon-free electricity grid by 2035. We found that Arizona voters support this proposal to transition to a clean and reliable grid by a 44-point margin (69% support, 25% oppose). The proposal is overwhelmingly popular with Democrats, who support it by an 89-point margin, and also receives majority support from Independents, who favor it by a 41-point margin. While Republican voters oppose the clean electricity standard by a 2-point margin, more than 40% say they support the proposal.

## Arizona Voters Support Transitioning to a 100% Clean Electricity Grid

The American Jobs Plan includes a proposal that puts America on a path to achieving a 100% clean and reliable electricity system by 2035.

# ARIZONA VOTERS SUPPORT FEDERAL GOVERNMENT INVESTMENTS TO CREATE MILLIONS OF CLEAN ENERGY JOBS WITH FAIR LABOR STANDARDS

Next, we asked respondents if they support or oppose the American Jobs Plan’s provisions to create new good-paying, union jobs in manufacturing new clean energy technologies such as wind turbines, solar panels, and electric vehicles. We found Arizona voters support these investments by a clear 42-point margin (67% support, 25% oppose). This includes an overwhelming 87-point majority of Democrats and a 45-point majority of Independents. While Republican voters oppose these investments by an 8-point margin, there is again notable GOP voter support, with more than 40% of Arizona Republicans backing clean energy job investments.

## Arizona Voters Support the American Jobs Plan's Investments in Clean Energy Jobs

The American Jobs Plan includes investments to create new good-paying, union jobs to manufacturing the technologies of the future, like wind turbines, solar panels, and electric vehicles. Do you support or oppose these investments?

DATA FOR PROGRESS

To assess support for federal investments in clean energy job creation, we also presented voters with two response options relating to clean energy jobs and asked them to select the one they most agree with. One option argued that the government should create millions of good-paying clean energy jobs, while the other argued that the government should not make these investments because they would be a waste of taxpayer money. We found that even after presenting voters with this counterargument, support for clean energy jobs remains high: By a 39-point margin, Arizona voters agree the federal government should make investments to create millions of new clean energy jobs across the country. Support also remains strong among Democrats and Independents, who agree with this stance by 86-point and 41-point margins, respectively. While a plurality of Republicans think federal investments in clean energy jobs would be a waste of taxpayer money, over a third (37%) support these investments.

## Arizona Voters Support Federal Investments to Accelerate Clean Energy Job Growth

# ARIZONA VOTERS WANT TO PROVIDE CONSUMERS INCENTIVES FOR PURCHASING LOW-POLLUTION TECHNOLOGIES

We then asked voters if they support or oppose the American Jobs Plan’s proposal to provide consumers rebates and other financial incentives for low-pollution technologies, such as electric vehicles, solar panels, and energy-efficient home appliances. We found that by a 43-point margin, Arizona voters support federal initiatives to make low-pollution technologies more affordable for consumers (68% support, 25% oppose). This includes an overwhelming 87-point margin of support among Democrats and a 37-point margin of support among Independents. Republicans support these incentives by a 4-point margin.

## Arizona Voters Support Consumer Incentives for Purchasing Low-Pollution Technologies

The American Jobs Plan includes funding to give consumers rebates and other incentives to purchase items such as electric vehicles, solar panels, and home appliances that are more efficient and create less pollution.

---

## CONCLUSION

---

These findings make it clear that Arizona voters broadly support federal investments to create new jobs by transforming our nation's electricity grid and manufacturing clean energy technologies. As lawmakers in Congress move to pass the bipartisan infrastructure framework and a budget reconciliation proposal, they should feel confident including investments to create millions of clean energy jobs.

## SURVEY METHODOLOGY

---

From June 12 to 20, 2021, Data for Progress conducted a survey of 567 likely voters across Arizona using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is  $\pm 4$  percentage
